Specifications

In-Line Tanks Performance Data

		Drawdown - Gallons (liters)			Dimensions - Inches (cm)			
Model Number	Volume Gal (liter)	20-40 PSI (138- 276 Kpa)	30-50 PSI (207- 345 Kpa)	40-60 PSI (276- 414 Kpa)	Precharge Pressure	Height	Diameter	Weight Lbs. (kg)
WM01	2.0 (7.6)	.7 (2.6)	.6 (2.3)	í	20 (138)	12-9/16 (32)	8-3/8 (21)	4-1/2 (2.0)
WM02	4.6 (17.4)	1.7 (6.1)	1.4 (5.3)) í	20 (138)	14-11/16 (37)	11-3/8 (28)	7-1/2 (3.4)

WM Series Connection 3/4" male.

NOTE: All tanks may be used up to 90°F. MAXIMUM WORKING PRESSURE 100 PSI.

NOTE: Install a pressure relief valve on any installation where the pump pressure can exceed the tank's maximum pressure.

^{*} Standard Atmospheric installation

^{**} To assume dependable drawdown volumes, and in keeping with the present industry practice, drawdowns are based on Boyle's law.
