

# Composite Tile

Quarrix™ Composite Tile is designed to be the ultimate roofing material for long-term performance, appearance and complete peace of mind for years to come. Quarrix Composite Tile offers the authentic look of traditional concrete or clay tiles in double roman profile.

## **Natural Splendor**

Carefully designed to create unmatched beauty with long-term performance. Our six rich tile colors create an attractive roof, complementing and enhancing any style of home. The colors can be blended for a customized and unique roof appearance.

## **Proven Performance**

Our exclusive formulation and controlled manufacturing process is supported with in-field proven performance and industry testing to give you peace of mind. It has been tested and exceeds minimums for rate of burn, smoke density, self and flash ignition, dynamic wind resistance at 110 mph, uplift bending, permeability and water absorption. Our proven performance is backed by a 50-year limited warranty.

## **Light Weight**

Our tile is a third of the weight of concrete and clay tiles (only 305 pounds per roofing square) making installation easy and far less expensive. This also means that it can be installed on existing homes without expensive structural roof modifications.

## **Effortless Installation**

Quarrix Composite Tile is easy to handle and can be cut, drilled and fastened with standard roofing tools for quicker and easier installation even on a variety of pitches and exposures. The tile offers hip/ridge rake, hip starter and metal closures available in matching colors.

# QUARRIX COMPOSITE TILE SPECIFICATIONS

Part #	Color	Description	Weight/ Tile	Weight/ Square	Roofing Square
2001BK	Black	Field Tile	3.3 lbs	303.6 lbs	92 pieces
