

# Viega PEX Press Polymer Fittings

June 2012

**viega**

Save time and increase profitability with Viega PEX Press polymer fittings.

Viega's new PEX Press polymer fittings help installers save time on the job so they can accomplish more. This fitting system provides 40 percent less pressure drop compared to standard U.S. polymer PEX crimp insert fittings. The only PEX fitting in the industry with the Viega Smart Connect® leak-detection feature, Viega PEX Press polymer fittings are made in the U.S.A. and are approved for potable water and radiant applications in residential and light commercial projects.

With Viega press technology, installers can make a secure, reliable connection in less than seven seconds in nearly any climate, hot or cold, and can be pressure tested immediately without waiting for glue to dry. Viega PEX Press polymer fittings are available in sizes  $\frac{3}{8}$ " to 2" and can be installed using the same hand and power tools as other Viega systems.

## Advantages

- Reduced callbacks because Viega Smart Connect feature helps installers identify unpressed connections
- Made in the U.S.A. and qualifies for most government jobs
- Utilizes existing Viega PEX Press hand and power tools
- Color-coded tool locator ring helps align press tool to ensure secure connection
- Helps ensure a consistent connection with three view holes in the attached stainless steel sleeve
- Easy-to-use factory-assembled fittings guarantee no missing components during installation
- Compatible with ViegaPEX™, ViegaPEX Ultra, Viega FostaPEX® and ViegaPEX Barrier tubing
- NSF approved
- Cost-effective Zero Lead™ solution
- Professional appearance
- Excellent corrosion resistance
- Comprehensive 10-year transferable warranty on the system

## Applications

- Potable water for new construction
- Potable water for retrofit applications
- Radiant systems

## Key Industries

- Residential
- Light Commercial
